

# SKIN *needling*

**S**kin Needling is a versatile treatment that can address various skin concerns, including fine lines, wrinkles, pigmentation, rosacea, scarring, and stretch marks. It involves a device with tiny needles that penetrate the skin at high speed, creating channels for active ingredients to penetrate and inducing controlled injury. This stimulates collagen production, strengthens capillaries, and rejuvenates dull skin. For added tightening and anti-ageing benefits, Radiofrequency treatments can be incorporated.

Our qualified therapists administer this treatment, which can be combined with Laser Genesis, Carboxytherapy, and Chemical Peels. If you are prone to pigmentation, the doctor may recommend using a pigment inhibitor product for two weeks before treatment.

The first step is to book with one of our doctors, who will analyse the area and provide personalized recommendations. Please note that a consultation fee of R600 is required in advance to secure your booking.

The R600 prepayment goes towards your first treatment, provided it is scheduled within three months following the consultation date. If not undertaken within the three months, the prepayment will be redeemed as the consultation fee.

**Please let us know if you would like assistance booking an appointment or have any further questions.**
